

Award-Winning Designers Celebrate the ROHL® Water Appliance™

Three Takes on Designing for the Most Used Appliance in the Kitchen

Multiple Spaces, One Classically Elegant Approach

Designing and specifying a prominently-placed kitchen, morning room, butler's pantry, and pantry for the 2016 **Philharmonic House of Design** was no easy feat. For designer Wendy Ann Miller incorporating two transitionally styled ROHL Water Appliances was important. "Today's design trends make it difficult to incorporate true transitional pieces and they are difficult to find," she says. "ROHL is a perfect fit for unifying and harmonizing design elements in a kitchen or bathroom." The result is modern style with classic elegance.

Marrying the Old with the New

For the kitchen in this 11,000 square-foot Spanish Colonial home, interior designer Katie Grantz chose a ROHL Water Appliance with an eye for seamlessly marrying old and new. "Our intention was to make the new construction cohesive with the old structure," she says. "The ROHL Collections allowed us to bring traditional and modern components together. In this case, the home was built in 1928 and had an interesting past. The architecture and existing gardens set the foundation for the design. ROHL spoke to the history of the home and the timeless look we were after."

Sophisticated, Southern Charm

A sense of history is a key component in the design philosophy of Lauren DeLoach. In the 2016 **Atlanta Homes & Lifestyles Southeastern Showhouse**, Lauren brought her love of authenticity together with contemporary materials to create a very special ROHL Water Appliance. Looking to create an elegant, effortless and classic environment, she blended a very today ROHL Luxury Stainless Steel Sink with a traditionally styled, made in the UK, ROHL Perrin & Rowe® Bridge Faucet with Sidespray. Lauren's style is inspired by tradition, yet created for the present.
